PARTNERSHIP (UNIVERSITIES / TRAINING ENTERPRISES)

intel

RAPID PROTOTYPING CHALLENGE

In India, an all-female team from Manipal Institute of Technology created a Smart Sign Board powered by Intel® Galileo technology. The Wi-Fi and GPS-connected sign board can alert drivers who exceed the speed limit, potentially reducing honking, traffic accidents, and police workload.

Initiatives for Innovation

See how some of tomorrow's most promising technologies are already being explored and refined by today's students.

University of Michigan Solar Car

Intel provided pervasive compute and connectivity technologies to the team that came in fourth out of 42 teams in the world championship race in the Australian Outback.
