### ABSTRACT

Vocabulary plays an important role in assisting communication and accounts for a relatively large proportion in exams, especially GCSE. Some digital platforms such as Quizizz, Padlet, Quizlet and Flipbook are really helpful in boosting students' vocabulary. The researchers designed and assigned unit-based homework on these aforementioned platforms. Students were asked to do homework, using electronic devices. The researchers investigated the effectiveness of applying IT in engaging students in homework doing creatively and aesthetically with a view to enhancing their knowledge on vocabulary. A survey questionnaire was conducted to collect data and informal interviews were employed to elicit students' opinions on the implementation of IT in developing their vocabulary. Results of the study revealed that students' vocabulary did benefit from these above platforms. In addition, student made much progress in studying English and became more confident when sitting an exam. From the study results, some recommendations have been proposed contributing to making full use of IT and materials to boost students' vocabulary.

She has been teaching English for 14 years at Tu Ky High School, a small but prestigious school in Hai Duong province. As a teacher, she always does her best in finding ways to motivate students engage her students in her lessons and teaching activities as well as enhance students' knowledge.
